

Your Real Mentor in College Search
760+ Universities, 15000+ colleges, 18 countries, 20 Counsellors

Job Oriented Education:

The wealth of knowledge acquired by an individual after studying particular subject matters is called education. It is the process of facilitating learning or the acquisition of knowledge, skills, values, beliefs, and habits that leads to moral and financial growth of self and humanity at large.

The myth of abundant manpower has been broken by various industry groups time and again. In a country like India, problem lies in quality and not quantity of manpower. Virtually every industry from IT, Retail, Finance, telecommunication, manufacturing and biotechnology is struggling to find skilled workers and managers as they expand.

Higher Education in India:

Based on the report of MHRD, the number of Universities has increased from 20 in 1950 to 740 in 2015. The sector boasts of 46 Central Universities, 342 State Universities, 227 State Private universities, 125 Deemed to be Universities, 51 Institutions of National Importance (established under Acts of Parliament) under MHRD (IITs - 16, NITs - 30 and IISERs - 5) and four Institutions (established under various State legislations). The number of colleges has also registered manifold increase by 74 times with just 500 in 1950 growing to 37,204, as on 31st March, 2013.

Revisiting the Skills:

Apart from necessary technical and domain expertise, the following skills are deemed essential for a successful career and we should choose our institution that can effectively inculcate these skills in the aspirant :

1. Effective communication skills
2. Problem-solving/ Team work
3. On the spot decision making
4. Cross cultural understanding
5. Broader vision of industry

The Classic Dilemma:

What career to choose after class 12th? This is the biggest question that runs through every student's mind once the board exams are over. Parents leave no stone unturned to explore best career oriented courses for their children. However, with growing vast options of career oriented courses, at times it becomes a problem of plenty.

There are five important variables affecting the decision:

1. Experience/ Views of parents
2. Aptitude of the student
3. Interest of the student
4. Marks in 10th and 12th Standard
5. Rank in the qualifying exam

Without proper guidance it becomes difficult for students as well as for parents to select the best option for a bright career.

Pressing the Success Key:

*The first step towards change is Awareness,
The second step is Acceptance*

As suggested by the above quote, CollegeScan handholds students with lesser awareness keeping financial and academic constraints of the aspirants in mind to help them take strategic decision.

Problem of Plenty:

Engineering: 10,00,000+ applicants every year and 4,500+ colleges. Stressed?

Management: 4,00,000+ applicants every year and 2000+ colleges. Stressed?

LAW: Want to be a reputed lawyer, but not sure where to start; NLUs or Private Univs?

Medical: What to choose amongst 380+ colleges offering more than 50,000 seats across India

Design: Interested in design as a career, but not sure whether to target NIFT, FDDI or top private colleges?

Others: Get information on course, eligibility, fees, infrastructure and more for over 15,000 colleges across India offering professional courses in mass communication, para medical, agriculture, commerce, Pharmacy, Hotel Management.

Make informed decisions at each step to get to the right college.

Why CollegeScan:

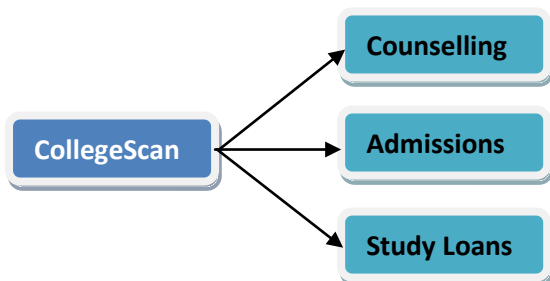

www.collegescan.in is an 'Awareness' portal for students to make informed decisions on higher studies considering various factors/parameters.
